Newsletter of the Federal Depository Library Program

Vol. 11, no. 15

GP 3.16/3-2:11/15

July 15, 1990

## Fall Council Meeting, October 1990

The fall 1990 meeting of the Depository Library Council will be held on Wednesday, October 24 through Friday, October 26, in Arlington, Virginia. The meeting place is the Rosslyn Westpark Hotel. Room rates are expected to be in the range of \$78 a night for a single. Further details about exact rates and airline discounts will appear in a future issue of Administrative Notes.

\*\*\*\*\*

## Time is Running Out!

**Now is the Time to Update Your Entry in the Depository Library Directory**

Depository librarians are asked to respond by **July 31** to the letter sent by the Chairman, Joint Committee on Printing, requesting verification of their library addresses and telephone numbers. This information will be used to update the JCP publication, A Directory of U.S. Government Depository Libraries.

\*\*\*\*\*

## Regionals May Now FAX Their Claims!

In an effort to expedite claims from regional libraries, GPO will accept claims from regionals via Fax, effective immediately. Claiming procedures are detailed in Chapter 9 of the Instructions to Depository Libraries. All procedures are to be followed; the sole exception being that Regionals can Fax rather than mail their marked shipping lists.

If the Faxing of Regional claims proves to be successful, selective libraries will be allowed to Fax claims at a later date.

The Fax number for Regional claims is: (202) 275-7453. This number is to be used **only** for Fax claims. If you have any questions, please call: Chief, Depository Services at (202) 275-1119.

## GPO Guidelines for Online Processing Of Depository Documents

The introduction of new technologies for the initial processing of depository materials holds great promise for streamlining the often tiresome tasks associated with the bibliographic control of documents. But while the advent of such systems has enabled many libraries to improve the efficiency and effectiveness of their depository operations, the planned use of such technologies has caused librarians to raise valid questions.

Librarians are concerned about how GPO, through the Instructions to Depository Libraries, will interpret its established rules on bibliographic control and the timely processing of depository materials, in this new environment.

GPO encourages the introduction of online processing of documents. Online processing can conform to GPO's instruction on the bibliographic control of depository holdings. This instruction is contained in Chapter 1, Part F of the Instructions to Depository Libraries and in pertinent part states: "depositories will maintain a holdings record to the piece level of all depository selections." The Instructions continue: "a depository holdings record can be part of a larger all encompassing library record ..."

The Instructions also state that: "cataloging all or part of the documents collection is always recommended." As shelflisting and cataloging facilitate access to depository holdings, GPO believes such measures taken in an online environment can significantly enhance the effectiveness of the entire depository operation.

GPO is less interested in the mechanics of bibliographic control than in seeing that depositories meet the standards established in the Instructions and that the library can demonstrate that these standards have been met. How these standards are met is left to the discretion of the library. Many librarians have asked: Will MARCIVE's or OCLC's or some other product suffice for a holdings record and/or shelflist? The answer depends on how these products are used.

Merely dumping a monthly tape into the online catalog does not constitute a holdings record to the piece level. Tape dumping by itself, would be similar to claiming that the Monthly Catalog is a holdings record. But tape loading, when the tape is tailored to the library's item number profile, checked against actual accessions and coupled with the library continuing to record individual issues of serials received would meet the requirements.

A shelflist, to meet the requirements for accountability and to facilitate public service, would have to contain certain additional information such as a SuDocs number, an accession date, and, if applicable, a unique depository identifier, location symbol, supersession notice, etc. GPO does not want to get into the business of defining every

acceptable shelflist as such a list could never be exhaustive. As long as the library has a record or records that fulfill these shelflist requirements, the requirements of the Instructions will be met.

Some libraries would prefer to use an online product as the basis for a shelflist but they are concerned about the time lag between receipt of an item and the appearance of its record. While depositories are still required to complete initial processing within a week to ten days, it can sometimes take considerably longer than that to receive a bibliographic record for a temporary holding record, using marked shipping lists or other methods, as a bridge until most of the records are accessible online. As studies have shown that most records are available within two months, a temporary holdings record can be maintained for up to three months in such an environment before a permanent record is required.

## **Depository Microfiche Contracts: Status Report**

- B354S - Microfiche of Miscellaneous Publications**  
Term: February 1, 1990 - January 31, 1991 (Anacomp, Inc.)  
Status: Contract running smoothly.
- B376S - Microfiche of Miscellaneous Maps**  
Term: April 1, 1990 - March 31, 1992 (Engineered Systems, Inc.)  
Status: Contract running smoothly.
- B456S - Microfiche duplicated from Government-Furnished microfiche**  
Term: May 1, 1990 - April 30, 1991 (Automated Datatron, Inc.)  
Status: Contract running smoothly.
- B513S - Monthly Catalog microfiche**  
Term: June 1, 1990 - May 31, 1991 (Anacomp, Inc.)  
Status: Contract running smoothly.
- B532S - Microfiche of House Committee Prints and Hearings**  
Term: April 1, 1990 - March 31, 1991 (Anacomp, Inc.)  
Status: Contract running smoothly.
- B562S - Microfiche of Congressional Reports and Documents**  
Term: February 1, 1990 - January 31, 1991 (Anacomp, Inc.)  
Status: Contract running smoothly.
- B568S - Microfiche of SEC Dockets and Digest, Tax Court Memos**  
Term: June 1, 1990 - May 31, 1991 (Microform, Inc.)  
Status: Contract just starting.
- B592S - Microfiche of Congressional Bills**  
Term: February 14, 1989 - March 31, 1991 (Microform, Inc.)  
Status: Contract running smoothly.
- B613S - Microfiche of Code of Federal Regulations**  
Term: May 17, 1989 - July 31, 1990 (Microform, Inc.)  
Status: Contract running smoothly.
- B788S - Microfiche of Flood Insurance Studies and NUREGs**  
Status: Specifications to be written after B791S contract. Bid opening tentatively scheduled for October 1.
- B789S - Microfiche of Cancergrams, Daily News, and GAO Reports**  
Status: Bid opening tentatively scheduled for August 1.

**B790S - Microfiche of Official Gazettes**

Status: Specifications will be written only if LPS cannot buy "off the shelf" microfiche.

**B791S - Microfiche of ERIC and CIJE**

Status: Specifications will be written after B789S. Bid opening scheduled for September 1.

**B795S - Microfiche of Senate Hearings and Committee Prints**

Term: January 4, 1990 - December 31, 1990 (Microform, Inc.)

Status: Contract is running smoothly.

## Readers Exchange

### Minnesota Government Publications Information Forum

Minnesota's third annual Government Publications Information Forum was held May 17 and 18, and drew over 60 librarians from four states. The forum is co-sponsored by the Government Documents Round Table of the Minnesota Library Association; Metrodocs, an informal coalition of Twin Cities area documents librarians; and the Regional Library at the University of Minnesota. For the first time the program extended over two days, to allow time for programs, demonstrations, and a workshop on depository issues. The first day's activities were designed to appeal to a broad audience, and were publicized widely; the second day was specifically for depository library staff.

The first day's program, entitled "Making Connections," included a panel of seven Minnesota depository librarians presenting ways of reaching out to make connections through school libraries, specialized groups, and creative uses of selective housing. Legal requirements and practical issues to consider were also covered. In the afternoon, four demonstration areas provided a chance to see and learn about the use of electronic government information. The demonstrations included Agricultural Extension CD-ROMS, Minnesota and national; Supermap, the Chadwyck-Healey product which maps census data; Datanet, a Minnesota database of census and other data for the state with mapping capabilities; and Census Bureau CD-ROM products demonstrated with dBase and Lotus.

The second morning provided an opportunity for a workshop on depository library responsibilities and issues. Almost all depositories from the region, which includes Minnesota and South Dakota, were represented, and depository librarians from North Dakota and Wisconsin participated as well. In the afternoon, the libraries which are on the PALS network, and interested observers, met to discuss loading of GPO tapes onto PALS, and related processing issues.

Many people participated in the planning and the programs, with coordination and logistics for the "Making Connections" program handled by Pat Rodkewich of the St. Paul Campus Libraries, University of Minnesota. Careful notes about procedures and details are being kept from each forum, so the planning can be easier each year. Time is planned for meals together and informal networking, which is important for an area with such widely dispersed depositories. Carrying out such meetings for depository librarians is a lot of work, but the benefits seem great and the enthusiasm is there. Already, Minnesota is looking toward the programs for next year's forum.

## From the Public Printer

May/June 1990

### Update on Alkaline Paper

I would like to address my entire message this month to an issue of great importance within our industry—alkaline paper. As you are well aware, concerns for extending the archival life of publications with enduring value have expanded in recent years, as valuable library research collections continue to be consumed in the "smokeless fire" caused by deteriorating acid-based papers.

Now, at the direction of the Committee on Appropriations of the House of Representatives, I have provided a report and plan to facilitate the use of alkaline paper within the Federal Government which I believe will be of great interest to you. Developed in consultation with the joint Committee on Printing, the plan commits GPO to take three important steps: 1) identify the extent, source, and types of archival type printing matter produced in-house and acquired commercially by GPO or other agencies; 2) ensure that alkaline paper with improved longevity is used in printing Government publications designated as having enduring value; and 3) provide for accurate reporting of alkaline paper usage.

Fiscal year 1989 data show that approximately 57 percent of the book-publishing and related papers purchased by GPO for in-house use and supplied to Federal agencies was produced by paper mills using alkaline production processes. This paper was purchased at prices that were competitive with acid paper. Approximately 40 percent of the total volume of paper used to produce contract printing for GPO is estimated to be alkaline. And, the implementation of the 1989 Environmental Protection Agency (EPA) guidelines on paper containing recovered materials does not appear to have adversely affected our ability to obtain adequate supplies of alkaline paper.

We at GPO and the JCP believe that alkaline paper is available in sufficient supply, and at competitive prices, to provide for increased printing of Government documents designated as having enduring value. Many Government publications apparently are already being printed on such paper.

You in the trade, particularly in the paper industry, have already shown your practical support for the greater use of alkaline paper. Fortunately, the call for increased use of alkaline paper has been met with its increased availability. You are well aware that the changeover to alkaline paper production methods generates economic benefits for paper manufacturers in terms of decreased production costs, while yielding paper with improved opacity and comparable strength and printability. The finished product can be sold at prices that are competitive with paper produced by acid production methods.

U.S. Government publications represent a significant component of the annual contribution to library research and general literature holdings. To ensure that this body of information remains accessible to future generations, Congress has taken steps to develop a national paper preservation policy and is currently considering two bills which would establish that policy. GPO firmly supports this action. Now I call on you to do all that you can, both practically and personally, to assure the increased use of alkaline paper.

# 1990 Catalog of Data User Courses Offered by the Census Bureau

## **Making TIGER Work For You!**

**TIGER -  
Topologically  
Integrated  
Geographic**

**Encoding and Referencing System-** is the computerized map that the Census Bureau will use to take the 1990 census. You can use it for computerized mapping, geocoding, routing, and as part of a generalized geographic information system. This one-day workshop provides information about the file contents, how it was developed, and what you can do with it. It features demonstrations of TIGER Line file applications. Cost: \$100

**Introducing Census  
Bureau Data on CD-  
ROM.** Compact Disc-  
Read Only Memory is  
a new medium that  
allows you to access  
enormous amounts of  
data through your  
personal computer.

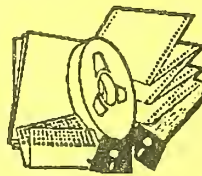

The entire 1987 Economic Censuses, foreign trade information, and other data bases are currently available in this medium, as will be 1990 census information. This one-day course targets users with little or no computer experience. It provides information on current and future data offerings in this medium, and through hands-on exercises, gives you practice in accessing a CD-ROM disc. Cost: \$100

**Accessing Data on Compact  
Disc.** As more and more Census Bureau data become available in this medium, learn what's available and how you can access it. This course covers the same material as

"Introducing Census Bureau Data on CD-ROM," but is designed for persons with some knowledge of DOS and computers. The hands-on session focuses on accessing data in a dBase III format from the Compact Disc. Cost: \$100

## **Understanding Federal**

**Statistics.** Now in its 15th year, this is the one course that anyone dealing with Federal statistics needs to take. Learn about the full range of information available from the Census Bureau and from other Federal statistical agencies. Lectures supplement the exercises and feature a variety of guest speakers. Take home materials and references offer a wealth of information. Offered three times in Washington, DC. Cost: \$275

## **NEW Looking At Housing Statistics from the Census**

**Bureau.** A new offering for 1990, this course will provide you with information about housing data products available from the Census Bureau. Emphasis is placed on the 1990 Census, the American Housing Survey, and other current housing surveys. Cost: \$100

## **NEW Using Economic Statistics from the Census**

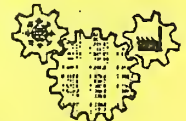

**Bureau.** This two-day course features up-to-date information from the 1987

Economic Censuses, with hands-on exercises using major report series. Data on CD-ROM is also featured. Major topics include the censuses of retail and wholesale trade, service industries, construction, agriculture and governments. Find out what new sectors of the economy will be covered in 1992. Cost: \$150

## **NEW Working With Industry and Import/Export Data.**

Learn about the new Harmonized System that lets you relate product data to export and import information. Find out about new data products on CD-ROM. This course offers several exercises that provide experience in making your way through industry reports, and features a demonstration of import/export data on compact disc. Cost: \$250

## **NEW Estimating Small Area Populations**

This two-day workshop, provides you with a general overview of the methods and data used in small-area population estimates. Included are discussions of basic concepts, principles, limitations of population estimation, and step-by-step descriptions and examples of uses. On the last half-day, you will be introduced to the Census Bureau's computer software and receive hands-on practice with some of the techniques. Cost: \$250
